Please add the following new claim:

(Original) A process to produce a branched alkyl ether sulfate composition comprising:

a) contacting an olefin having an average carbon number in the range of 3 to 18 with 1,3propane diel in the presence of a catalyst effective to react the olefin with the diel thereby
producing a branched alcohol composition; and

b) contacting the branched alcohol composition with a sulfating agent under conditions effective to produce a branched alkyl ether sulfate composition.
